S-REITs Monthly Update (Sep 26)

Highlights

- An influx of safe-haven liquidity and low domestic interest rates have led to a record volume of transaction for commercial properties, encompassing office and retail properties. Thus, the S-REIT sector is supported by firm asset valuation and continued low cost of debt.
- Maintain OVERWEIGHT. The S-REIT sector is a major laggard. Thus, S-REITs are likely to be more resilient. BUY CAREIT (Target: S\$1.39), CICT (Target: S\$3.06), LREIT (Target: S\$0.79), MPACT (Target: S\$1.71), NTTDCR (Target: US\$1.29) and UIBREIT (Target: S\$1.16).

Analysis

- The FSTREI corrected 5.7% in Sep 26, underperforming the STI's dip of 1.4%. Yield for 10-year Singapore government bonds rose 23bp to 2.58%. US core PCE inflation was stable at 3.0% yoy in Aug 26.
- KDCREIT is acquiring 88.6% effective interest in Tokyo Data Centre 4 and 5**, two freehold, hyperscale fully fitted colocation DCs located in Inzai City, Greater Tokyo, Japan. The two DCs provide an NPI yield of 4-5%, compared with other comparable transactions at low-4%. The aggregate purchase consideration (100% basis) of JPY190.0b (S\$1,548.5m) represents a 2.1% discount to the latest valuation. The two DCs are 100% occupied and provide an attractive built-in contractual rental escalation of 2.8%. Management estimated the acquisition to be accretive by 2.6%.
- KREIT has agreed to divest its 99.38% interest in T Tower**, a freehold Grade A office building in Seoul, to a South Korea-based real estate fund. The agreed value for the entire property is KRW348.8b, representing a 37.2% premium to its May 19 acquisition price and a 7.4% premium to its Aug 26 valuation in local currency terms. The transaction implies an exit NPI yield of 3.9%. Together with the divestment of KR Ginza II in Tokyo and assuming net proceeds were used to repay debt, aggregate leverage would decline from 40.0% to 38.0% on a pro forma basis. KREIT intends to use up to S\$25m of net sale proceeds for open-market unit buybacks.
- OpenAI to set up office at Shaw Tower**. OpenAI is reportedly in talks to lease 100,000sf across five floors at the redeveloped Shaw Tower on Beach Road, marking a potential major expansion of its Singapore presence. The proposed office would represent a substantial increase from its current coworking space at CapitaSpring and signals confidence in Singapore as a base for its regional operations. While the lease has yet to be confirmed, the prospective move highlights the growing demand for premium office space from artificial intelligence companies expanding in Singapore.

- **SUN's portfolio reconstitution** aims to strengthen its Singapore presence, while reducing overseas exposure, following its strategic review under its new sponsor. It will be marketing 177 Pacific Highway and 21 Harris Street in Sydney, alongside its 50% stake in Olderfleet, 477 Collins Street in Melbourne, for divestment. Management expects successful disposals to lower aggregate leverage to below 40%, from 43% as of Jun 26. The move would sharpen SUN's focus on its core Singapore assets and reduce foreign currency exposure. The divestment would improve interest coverage ratio, while creating headroom for acquisitions and unit buybacks.
- **NTTDCR was included in the FTSE EPRA Nareit Global Developed Index** with effect from 21 Sep 26. It passed all eligibility tests, including the EBITDA criteria and other liquidity requirements, during the latest quarterly review.
- **MLT is divesting its logistics property at 365 Fitzgerald Road** in Derrimut, Victoria, for A\$28m (S\$25.2m), a 3.7% premium to its latest valuation. The property, acquired in 2016 for A\$18m, has been vacant since Apr 26. Its divestment reflects MLT's strategy to sell older assets with limited development potential and release capital for investment in modern logistics facilities. The transaction is expected to be completed by 3QFY27.
- **Adrian Chui would step down as CEO** and executive director after more than nine years in the role at ESR-REIT. Chui will continue to carry out his duties and work with the board and sponsor ESR Group to ensure an orderly transition. The announcement did not provide a specific reason for his decision or name a successor. The board has expressed its appreciation for his leadership and contributions.
- **Top outperformers.** Two REITs with predominantly overseas exposures IREIT and DHLT rebounded 9.8% and 1.3% respectively in Sep 26. UIBREIT gained 1.3% due to inclusion in the FTSE Global Equity Index Series Asia Pacific Ex Japan Ex China Small Cap Index on 21 Sep 26 and iEdge S-REIT Index and iEdge S-REIT Leaders Index on 28 Sep 26. NTTDCR lost only a marginal 3.1%, supported by inclusion to the FTSE EPRA Nareit Global Developed Index with effect from 21 Sep 26.
- **Top underperformers.** US-based REITs PRIME, DCREIT and KORE dropped 21.1%, 9.9% and 6.4% respectively. Industrial REITs EREIT and CLAR dropped 9.2% and 7.8% respectively.

Hong Fok Corp (HFC SP)

Trading buy range: S\$0.895-0.900
Last price: S\$0.910
Target price: S\$0.985
Protective stop: S\$0.860

Price rebounded from its previous low support zone, establishing a firm horizontal demand anchor. The RSI has turned bullish, signalling decaying downside velocity and the early stages of a bullish momentum transition. As long as price remains supported above this support, we see a sustained upward expansion towards overhead swing high resistance targets.

The potential upside target is S\$0.985. Stop-loss could be placed at S\$0.86.

Approximate timeframe on average: 1-2 weeks (initiate this trade idea if the stock hits the entry price range within three trading days)

DBS Group (DBS SP)

Trading sell range: S\$77.76-77.78
Last price: S\$77.50
Target price: S\$72.93
Protective stop: S\$79.58

Price was capped at its previous price high resistance zone, printing a lower high within the emerging swing sequence. As long as price remains capped underneath this overhead resistance, we see a sustained downward expansion towards lower support.

The potential downside target is S\$72.93. Stop-loss could be placed at S\$79.58.

Approximate timeframe on average: 1-2 weeks (initiate this trade idea if the stock hits the entry price range within three trading days)
