Civmec (CVL SP)

Trading sell range:	S\$1.51-1.52
Last price:	S\$1.52
Target price:	S\$1.38
Protective stop:	S\$1.57

Price further violated its recent price low, with subsequently counter-trend rallies being capped underneath this support-turned-resistance zone. The RSI is approaching the oversold threshold, and its sustained location within the bearish territory reflects intense down-trend velocity. As long as price remains capped beneath this supply, we see continued downward expansion towards the lower demand targets.

The potential downside target is S\$1.38. Stop-loss could be placed at S\$1.57.

Approximate timeframe on average: 1-2 weeks (initiate this trade idea if the stock hits the entry price range within three trading days)

Our institutional research has a fundamental HOLD and target price of S\$0.80.

Hongkong Land Holdings (HKL SP)

Trading sell range:	US\$8.06-8.07
Last price:	US\$8.05
Target price:	US\$7.44
Protective stop:	US\$8.38

Price executed a retest and structural rejection along its support-turned-resistance zone. The RSI remains in bearish territory and is turning downward after testing its neutral 50-midline. As long as price remains capped underneath this converted supply anchor, we expect continued downward expansion towards the lower demand targets.

The potential downside target is US\$7.44. Stop-loss could be placed at US\$8.38.

Approximate timeframe on average: 1-2 weeks (initiate this trade idea if the stock hits the entry price range within three trading days)
