Sasseur Site Visit: Value Hunters Keep Chongqing Busy

Highlights

- Our recent visit to Sasseur's Liangjiang and Bishan retail outlets confirmed its leadership in Chongqing's retail outlet market.
- Both outlets continued to see strong occupancy of 100% at Liangjiang and 98.9% at Bishan, supporting Sasseur's 1H26 sales growth.
- Sasseur REIT trades at 0.77x P/NAV, with an annualised yield of 10.6%. Its double-digit yield and resilient outlet sales are balanced against China risks. Within S-REITs, we prefer CICT, NTTDCR and UIB REIT.

Analysis

- Site visit to Sasseur's two Chongqing outlets.** We visited Sasseur REIT's (Sasseur) Liangjiang and Bishan outlets, which together make up 48% of portfolio valuation and 63% of 1H26 portfolio sales. Management highlighted that retail tenants make up over 95% of stores and pay Sasseur a commission on their sales (10-16% of sales), so the outlets earn more when shoppers spend more. F&B, cinema and entertainment tenants make up less than 5% of stores and pay fixed rent instead.
- Liangjiang: The flagship and anchor asset.** Opened in 2008, Liangjiang hosts 374 tenants across 73,373sqm of GFA, anchored by sports brands such as NIKE, FILA, Anta and Adidas. It has stayed fully occupied since 4Q23 and generated Rmb1,274.4m of sales in 1H26 (+7.8% yoy), or 54% of the portfolio total sales. It carries the highest share of international brands in the portfolio (17.7% of revenue) and the largest VIP base, at 1.87m members.
- Bishan: Smaller, but the fastest grower.** Bishan is a suburban outlet opened in 2014 with 186 tenants, led by domestic names such as POLOWalk, Anta, Li-Ning and Bosideng. Sports brands make up 32.9% of its gross revenue, the highest in the portfolio. 1H26 sales grew 10.9% yoy to Rmb206.0m, the fastest in the portfolio, while occupancy rose 2.0ppt yoy to 98.9%. Its 637,000 VIP members and family attractions such as a strawberry farm help draw repeat visits.
- Market leader in Chongqing.** Sasseur owns two out of four outlet malls in Chongqing, and leads the market in sales. It attributes this to its early mover advantage (Liangjiang opened in 2008), larger sales scale, as well as better brand mix and brand availability than peers. The catchment is large, with Chongqing home to 31.9m residents at end-25, and shoppers are mainly domestic travellers rather than international tourists.

Company Description

Sasseur Real Estate Investment Trust operates as a real estate investment trust. The company invests in a diversified portfolio of retail real estate assets. Sasseur Real Estate Investment Trust serves customers in Asia.

- **Domestic and sports brands drive traffic.** Management said local brands generate about 72% of net sales, with international brands making up the remaining 28%. By gross revenue, domestic fashion (44.3%) and sports (22.4%) contribute about two thirds, while international brands contribute only 15.5%, which suggests they pay lower commission rates. As most shoppers are Chinese domestic travellers, Sasseur leans on local brands for their wider availability and stronger value proposition.
- **Sales peak during anniversary and Golden Week.** Sasseur does not take part in online shopping festivals such as 6.18 and 11.11. Instead, it focuses on its offline peaks: the annual anniversary sales (Liangjiang: 24 September to 7 October; Bishan: 25 September to 7 October), which run into the National Day Golden Week holiday in early-October. These are the highest sales periods of the year, and each anniversary sale opens with an overnight sale on the first day. A stronger-than-expected sales period should positively support 2H26. Other upcoming promotional periods include the red festival, as well as the year-end promotions.
- **Short leases let management reshuffle tenants quickly.** Tenant contracts are usually one year. WALE is 1.5 years by NLA and 0.7 years by gross revenue, and 56.7% of gross revenue expires in 2026. These shorter periods are deliberate, and let management replace weak brands quickly. Most tenants renew, but they are often relocated within the mall to improve the layout. Remodelling and brand upgrades take place every July, ahead of the peak anniversary and Golden Week season.
- **Strong VIP base.** The group's total VIP membership crossed 5m for the first time, reaching 5.19m at end-Jun 26 (+16.4% yoy), and members contributed over 60% of portfolio sales. A year-round event calendar, including brand tie ups such as the HAZZYS atrium sale at Liangjiang, keeps members engaged and coming back.

Financial Snapshot

- **Strong balance sheet.** Gearing was 25.6% (limit: 50.0%), giving about S\$865m of debt headroom. Interest coverage ratio (ICR) improved to 5.6x from 4.7x. Cost of debt fell to 3.7% from 4.4% after an early onshore refinancing, and average debt maturity is now 4.8 years. All borrowings are in renminbi. NAV per unit rose to S\$0.82 from S\$0.79.
- **Double-digit yield.** The annualised 1H26 DPU of 3.366 S cents gives a 10.6% yield at current price, well above several other listed peers. Distributions are tax exempt in the hands of all unitholders.
- **Defensive income structure.** About 70% of Entrusted Management Agreement (EMA) rental income is fixed, with 3% annual step-ups, and the entrusted manager bears all operating costs. This limits the hit from slower sales, but the EMA is due for renewal in 2028.

Valuation/Recommendation

- **Sasseur REIT currently trades at 0.77x P/NAV, in line with peers, and has an annualised distribution yield of 10.6% at the current price.** The EMA structure, which is about 70% fixed, provides income visibility. Outlet sales growth has also continued to outpace China's retail sales (+1.3% yoy in 1H26), which our Chongqing site visit supports. Within S-REITs, we continue to prefer NTT DC REIT and UIB REIT for their structural growth exposure and lower China risk, and CICT on positive rental reversions.
- **Key risks include:** a) a fragile China consumer recovery; b) uncertainty over EMA renewal terms in 2028; and c) renminbi volatility.

Share Price Catalyst

- Strong anniversary and Golden Week sales in 2H26; b) recovery of Hefei's occupancy after its AEI, with new tenants opening from Aug 26; c) further cuts in financing costs; and d) favourable EMA renewal terms and accretive acquisitions.

Trading buy range:	S\$0.940-0.945
Last price:	S\$0.975
Target price:	S\$1.060
Protective stop:	S\$0.915

Price further penetrated its recent price high, printing a clean higher-high pattern that confirms an ongoing trend continuation. The RSI has turned bullish and continues to slope upward with positive velocity. As long as price defends this newly established support floor, we could expect a continued upward expansion towards higher supply targets.

The potential upside target is S\$1.06. Stop-loss could be placed at S\$0.915.

Approximate timeframe on average: 1-2 weeks (initiate this trade idea if the stock hits the entry price range within three trading days)

Price rebounded from its previous low support zone, initiating the second leg of a potential double-bottom reversal pattern. The RSI could be forming a potential divergence warning.
