Company Update | CSE Global (CSE SP/BUY/S\$0.96/Target: S\$1.79)

Page 2 →

- Key takeaways from our recent meeting with management suggest that CSE’s outlook remains positive, with more DC contract wins expected by end-26. We project stronger 2H26 margins as start-up costs normalise. Credit risk is relatively low given CSE’s exposure to established hyperscalers and US government end-users. Maintain BUY with a S\$1.79 target price. CSE trades at 15x 2027F PE.

Market Spotlight

Page 5 →

- US stocks were lower on Friday. All indices fell as the information technology, communication services and consumer discretionary sectors slid. There were more decliners than advancers on both the NASDAQ and NYSE.
- The FSSTI rose 12.03pt to 5,415.53, supported by strength in DBS, Singtel and ST Engineering. Mid-cap indices fell while small-cap indices rose, with a broad market advance on S\$2.08b turnover.

As a result, and from time to time, we may make a technical recommendation that is opposite to our fundamental BUY/HOLD/SELL rating.

CSE Global (CSE SP)

Positive Highlights From Meeting Reinforce Growth Outlook

Highlights

- Key takeaways from our recent meeting with management suggest that CSE's outlook remains positive, with more DC contract wins expected by end-26 as well as strong potential for more contracts from the second hyperscaler.
- We still expect stronger 2H26 margins as start-up costs normalise and operating efficiency improves. Credit risk is low given CSE's exposure to established hyperscalers and US government end-users.
- Maintain BUY with a target price of S\$1.79. CSE currently trades at 15x 2027F PE, around its long-term mean despite having commendable growth.

Analysis

- **Key highlights from management meeting.** CSE Global (CSE) highlighted that existing data centre (DC) contracts remain intact, with continued opportunities for new project wins. Management remains optimistic about continued order momentum, with further contract wins expected in 4Q26 as major customers finalise their projects for the following year. CSE's DC exposure to US government end-users provides some insulation against funding risks, given their relatively low credit risk and long-term project commitments. CSE has also commenced work with a second hyperscaler, presenting further growth opportunities as it expands its presence in the US DC market.
- **S\$254.8m in new US electrification contract wins.** CSE has secured three major US electrification contracts worth a combined S\$254.8m in Aug and Sep 26, comprising: a) a S\$64.3m contract accounted in Aug 26 for the design and manufacture of power distribution centres (PDC), together with the integration of electrical and control systems, for the Cheyenne Power Hub project in the US, and b) two additional contracts worth S\$190.5m in Sep 26 for works on the Calcasieu Pass 2 (CP2) LNG project in Louisiana and a follow-on order for the Cheyenne Power Hub project. These contracts will be executed progressively between 2026 and 2028.
- **Strong contract wins support orderbook and revenue visibility.** The S\$254.8m in new contract wins is equivalent to approximately 41% of CSE's S\$620m orderbook as at end-1H26, reflecting sustained order momentum and strong demand for its electrification solutions. Management expects further order wins in 4Q26, as major US customers typically finalise their project requirements for the following year during this period. With project deliveries extending into 2028, we expect these new contracts to provide greater medium-term revenue visibility and support CSE's growth prospects.

Company Description

CSE Global provides systems integration and information technology solutions, computer network systems, and industrial automation. The company also designs, manufactures, and installs management information systems. CSE Global develops, manufactures, and sells electronic and micro processor monitoring equipment.

- **Capacity expansion to accommodate demand.** CSE plans to expand production capacity further in 2027 to accommodate growing demand from hyperscalers, favouring leased facilities to preserve capital. Meanwhile, communications should continue to provide stable contributions, while automation is expected to recover as costs related to the wind-down of water and wastewater projects normalise.
- **Near-term outlook remains resilient despite AI funding concerns.** The recent sell-off in AI-related stocks has raised concerns over rising financing costs, potential DC oversupply and slower hyperscaler capital expenditure, which could weigh on future demand for CSE's electrification solutions. We believe CSE's existing orderbook provides a degree of insulation from near-term market uncertainties, supported by its focus on established hyperscalers and end-customers with long-term commitments. While a prolonged slowdown in DC investments remains a risk to future order intake, we expect CSE's near-term operating momentum to remain intact.
- **Operating efficiency expected to improve in 2H26.** CSE's operating performance is expected to strengthen in 2H26 as the temporary cost pressures experienced in 1H26 gradually ease. Start-up costs at the Champion Park facility should normalise as operations ramp up towards steady-state, while the completion of water/wastewater project wind-downs should reduce additional cost pressures. Alongside improving project execution and continued demand for electrification solutions, these developments should support stronger operating margins and profitability in 2H26.
- **Electrification remains the key growth driver.** CSE's electrification segment continues to anchor its growth outlook, supported by increasing investments in US DC and LNG infrastructure. The segment recorded a robust revenue growth of 64% yoy in 1H26, significantly outpacing the communications and automation segments. CSE is focusing on financially strong hyperscalers, with AWS switchboards and electrical distribution centres (EDC) for a second hyperscaler underpinning growth. We expect the electrification segment to remain the group's main earnings growth driver, supported by sustained infrastructure demand, recent contract wins and the ramp-up of its Champion Park facility.

Long-term Historical PE Band

Source: Bloomberg, UOB Kay Hian

Valuation/Recommendation

- **Maintain BUY with an unchanged target price of S\$1.79**, based on an unchanged 29x 2027F PE (+1.5 SD to mean). This reflects potential re-rating from its historical 17x mean, driven by the DC electrification narrative and strong order intake. We believe the premium is justified by the Amazon warrant relationship, strong order momentum following S\$254.8m in recent contract wins, and improving medium-term earnings visibility.
- At S\$0.96, the stock trades at around 15x 2027F PE, which is a meaningful discount to peers and underprices the DC growth story.

Earnings Revision/Risk

- We make no changes to our earnings forecasts.

Share Price Catalyst

- Further improvements in corporate governance and board oversight.
- New hyperscaler or large LNG contract announcements.
- EPS-accretive acquisitions or strategic partnerships.

Market News

US stocks were lower on Friday, as the information technology, communication services and consumer discretionary sectors led shares lower. At the close of the NYSE, the Dow Jones fell 0.34% while the S&P 500 index was down 1.09% and the NASDAQ Composite index slid 2.14%. Falling stocks outnumbered advancing ones on the NYSE by 1,569 to 1,152 and 59 ended unchanged; on the Nasdaq Stock Exchange, 3,577 declined and 1,261 advanced, while 149 ended unchanged.

During the last trading session, the FSSTI rose 12.03pt to 5,415.53. Among the top active stocks were DBS (+0.5%), Singtel (+0.5%), ST Engineering (+1.4%), SingPost (-1.8%) and UMS (+2.6%). The FTSE ST Mid Cap Index fell 0.2%, while the FTSE ST Small Cap Index rose 0.5%. The broader market had 366 gainers and 193 losers with a total trading value of S\$2.08b.

Technical Analysis

Analyst(s)

Wong Shueh Ting CFTe

shuehting@uobkh.com

+65 6590 6616

Last close: 5,415.53

Outlook:

The FSSTI executed a structural rejection at the 5,828 peak, marking a potential macro top. A key momentum warning is confirmed by a prominent divergence. The subsequent penetration below the middle Bollinger Band violates short-term dynamic baseline support. This dynamic breakdown tilts structural probabilities toward mean reversion targeting the lower Bollinger Band baseline in the coming week. A formal structural trend transition to a confirmed bearish regime hinges on the formation of a sequential lower high and lower low; maintaining price action strictly capped underneath the 5,828 resistance anchor will validate this macro shift and unlock downside expansion towards deeper support zones.

Strategy:

Investors could distribute if price forms a lower higher and a lower low as this would confirm a shift to a downward trend.

Support: 5,370/4,930

Resistance: 5,750/5,830
