Highlights

- Singapore equities weakened in Oct 26, with the STI falling 5.3% as investors became more sceptical about AI investment returns following Firmus' cancelled IPO. Plantation, shipyards, technology and banking stocks led the declines, while land transport and REITs proved relatively resilient.
- Key events included: a) financial markets have become sceptical on investment returns from AI; b) the yield for 10-year Singapore government bonds slipped 23bp to 2.24%; and c) the Fed kept the Fed Funds Rate unchanged at 3.75% on 28 Oct 26.
- Key upcoming events to look out for include: a) the US Midterm Elections, b) ASEAN Summit on 16-18 Nov 26, c) Singapore FinTech Festival on 18-20 Nov, and d) 3Q26 GDP update.

What's New

- **The reality check on AI** started when the planned US$5b Australian IPO for Nvidia-backed Firmus was cancelled on 9 Oct 26. Since then, we have seen a series of failed fund-raising exercises, which indicates that financial markets have become more sceptical and circumspect regarding the enormous upfront investment in chips and data centres (DC) incurred to develop AI.
- **STI performance.** The Straits Times Index (STI) fell heavily by 5.3% mom in Oct 26. Land transport (+0.8%) and REITs (-0.7%) held up, but plantation, shipyards, technology and banks lost 19.5%, 8.8%, 7.1% and 6.4% respectively. The National Environment Agency issued notices to 10 companies, including Wilmar, Bumitama, First Resources and Indofood Agri, under the Transboundary Haze Pollution Act.
- **Top outperformers.** The top gainers were the Jardine group of companies DFI Retail (DFI, +9.4%), Jardine Matheson (JMH, +8.2%) and Hongkong Land (HKL, +3.1%). S-REITs CapitaLand Int Comm Trust (CICT), Frasers L&C Trust (FLT), Suntec REIT (SUN) and Cent Accom REIT (CAREIT) gained 2.2%, 1.7%, 1.5% and 1.0% respectively.
- **Top underperformers.** Technology companies CSE Global, UMS, AEM and Frencken lost a hefty 29.4%, 25.8%, 24% and 23.3%, respectively. Plantation companies Bumitama, First Resources and Wilmar declined 26.9%, 25.1% and 16.6% respectively.
- **MAS has kept monetary policy unchanged** and maintained the prevailing rate of appreciation for the SGD nominal effective exchange rate (S$NEER) policy band at its Oct 26 review, allowing the SGD to strengthen gradually to contain imported inflation. Economic growth remains firm, supported by strong orders for AI products and capacity expansion for the technology sector. MAS forecasts core inflation at 1.5-2.0% and headline inflation at ~2.0% for 2026, with both projected at 1.5-2.5% in 2027. Inflation risks remain tilted upwards, particularly from energy and food prices. MAS expects growth to moderate as the AI investment cycle slows and global financial conditions tighten.
- **Singapore's economy expanded by 5.4% yoy in 3Q26**, according to advance estimates, moderating from 6.2% yoy in 2Q26. On a seasonally adjusted qoq basis, GDP grew by 1.1%, easing from 1.5% previously. Manufacturing growth slowed to 7.5% yoy from 12.9%, with gains in electronics, precision engineering and transport engineering outweighing declines in chemicals and biomedical. Construction growth accelerated to 8.8% yoy, supported by higher public and private sector output. Services growth held steady at 5.2%, led by wholesale trade and transport & storage.
- **Anthropic deepened its presence in Singapore** by opening its fifth Asia Pacific office and signing a MOU with the Ministry of Digital Development and

Information. The agreement covers AI safety, security and model evaluation, research into AI adoption, and responsible deployment across the public and private sectors. The new office is hiring to support growing local demand, including GovTech, DBS, GIC, Grab and Sea. The expansion underscores Singapore's importance to Anthropic. Singapore is ranked second among 121 countries for Claude usage relative to population.

- **AI demand drives NODX growth.** Singapore's non-oil domestic exports (NODX) surged 68.4% yoy in Sep 26, accelerating from August's revised 46.1% yoy increase. Growth was driven by a pick-up in non-electronic exports, which rose 54.2% yoy, supported by large shipments of ship and boat structures. Electronic exports increased 107.6% yoy, underpinned by strong AI-related demand for disk media products, semiconductors and PCs. The substantial contribution from ship-related shipments suggests September's exceptional growth should not be extrapolated to subsequent months.

Major corporate developments during September:

- **DBS** denied that its Indonesian subsidiary would merge with Bank Central Asia, stating there was "no truth" to the speculation. The rumoured deal involved swapping DBS's 99% stake in DBS Indonesia for new BCA shares.
- **StarHub** confirmed it is in discussions with Keppel regarding a possible transaction involving M1. StarHub stressed that there is no certainty the discussions will progress or result in a transaction.
- **Seatrium** has secured a contract from Excelerate Energy to convert an LNG carrier into a floating storage and regasification unit (FSRU), with an option for a second conversion. Engineering work is scheduled to begin in 4Q26 and delivery targeted for 2028. Contract value was not disclosed.
- **Seatrium** secured work from Keppel's wholly owned subsidiary RigCo to complete four offshore rigs, with a total estimated contract value exceeding S$500m. The rigs comprise a 7th generation drillship and a harsh-environment jackup scheduled for delivery in 2027 and 2028 respectively, plus two mid-water semisubmersibles.
- **Sembcorp** Green Infra, Sembcorp Industries' wholly owned Indian subsidiary, has filed a draft prospectus for a potential IPO in India to raise up to INR37.5b (US$390m). A separate listing could unlock value for Sembcorp's Indian renewables business and support debt repayment.
- **DFI Retail** plans to open 250 additional Starbucks stores, primarily in Thailand and Vietnam, aiming to build a billion-dollar business within three years. It has agreed to exchange its 50% stake in Maxim's Caterers for Maxim's interests in the Starbucks licensed business, comprising over 1,100 outlets across seven Asian markets, plus US$340m in cash.
- **KREIT** has agreed to acquire a 51% interest in Keppel South Central from its sponsor, Keppel Ltd, for S$626.2m, equivalent to S$2,350psf, and 3-4% below independent valuations. The acquisition provides an initial net property yield of 4.3% and is accretive to DPU by 2%. Keppel Ltd will provide a guaranteed monthly income of S$2.23m for a period of five years.
- **NTTDCR** has proposed to tie performance fee to DPU growth, effective from FY27: a) No performance fee would be payable if DPU growth is 3% or less; b) growth above 3% but below 5% would attract a fee of 0.1% of deposited property, and c) increase to 0.2% for growth of at least 5%.

Action

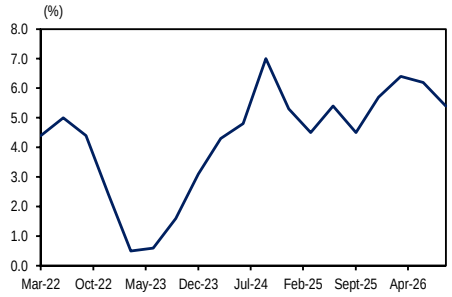

- We are positioned defensively due to headwinds from elevated inflation from a prolonged conflict in the Middle East. Our investment themes are:
  a) Value creation through asset recycling and monetisation: Keppel (Target: S$11.90)
  b) Growth from Singapore as an aviation hub: SATS (Target: S$5.00)
  c) Undervalued STI component stocks: CICT (Target: S$3.11) and YZJ Shipbuilding (Target: S$5.90)

Singapore Exchange (SGX SP)

Trading Sell Range:	S$20.24-20.25
Last Price:	S$20.24
Target Price:	S$17.95
Protective Stop:	S$20.82

The price is currently consolidating within a potential bear pennant pattern following a strong prior mark-down leg. The RSI remains anchored in strong bearish territory and is sloped downward near the oversold threshold. The price favours a downward breakout through lower pennant support triggering a continuation wave toward lower targets.

The potential downside target is S$17.95. Stop-loss could be placed at S$20.82.

Approximate timeframe on average: 1-2 weeks (initiate this trade idea if the stock hits the entry price range within three trading days)

Our institutional research has a fundamental HOLD and target price of S$23.40.

iFAST Corp (IFAST SP)

Trading Sell Range:	S$7.68-7.69
Last Price:	S$7.68
Target Price:	S$6.67
Protective Stop:	S$7.98

The price was rejected at its support-turned-resistance zone. The RSI remains firmly anchored in bearish territory and is actively turning downward with negative velocity. As long as the price remains capped beneath the converted resistance we see continued downward expansion toward lower targets.

The potential downside target is S$6.67. Stop-loss could be placed at S$7.98.

Approximate timeframe on average: 1-2 weeks (initiate this trade idea if the stock hits the entry price range within three trading days)

Our institutional research has a fundamental BUY and target price of S$12.18.
